SOFTWARE DEVELOPER

As a Computer Science major born in Bolivia, I bring a robust skill set encompassing proficiency in diverse programming languages such as Python, Java, C#, C, and C++. I have experience in web development, including Node.js, CSS, JavaScript, Ionic, and Angular, along with knowledge of Firestore and Firebase. With a keen interest in machine learning and AI, I am committed to continuous learning, problem-solving, and effective collaboration. My strong analytical abilities, combined with excellent communication skills, make me a versatile contributor to dynamic projects. I am eager to leverage my skills and passion for technology in a challenging and innovative environment.

KEY COMPETENCIES

Programming Proficiency	Communication Skills	Analytical Skills
Web Development	Problem-Solving Skills	Database Knowledge
Software Development	Data Structures and Algorithms	Adaptability

PROFESSIONAL EXPERIENCE

I have completed multiple projects that demonstrate my ability to apply my programming skills to real-world challenges. My experience includes developing websites, games, applications, and tools across various programming languages and frameworks, including Python, Java, C++, JavaScript, and web development technologies such as Node.js, Angular, and Ionic.

PERSONAL PROJECTS

Portfolio Website	Sudoku	Wordle
Song Association Helper	Racing Car Game	To-Do List WV
To-Do List DV	Minesweeper	SV Mod

Disclaimer: All the projects mentioned above, included detailed descriptions and code repositories can be viewed on my website portfolio

---

STUDIES

Bachelor's Degree in Computer Science (Ongoing)
University of Florida, USA
AA in Computer Science (2023)
Miami Dade College, USA

LANGUAGES

Spanish (Native)	English (Fluent)
