EDUCATION

University of Florida

Bachelor of Science in Computer Science - GPA: 3.5

Gainesville, FL

May 2025

Amazon Web Services (AWS)

AWS Certified Cloud Practitioner

Online

July 2025

PROJECTS

Task Manager | *React, Next.js, Node.js, Express.js, MariaDB, Firebase*

- Designed and implemented a RESTful backend with full CRUD operations and relational database integration.
- Developed responsive UI with React/Next.js and optimized data handling for a 15% faster project turnaround.
- Documented API endpoints and schema models to streamline collaboration and testing.

IMDB (Key-Value Database) | *C++*

- Built a concurrent key-value database with LRU eviction and persistent storage, optimized for thread safety across 100+ parallel operations, improving data access speed by 40%.
- Added a role-based access control system with secure admin/user privileges, boosting system security by 60% and eliminating unauthorized modifications entirely.
- Implemented a Pub/Sub module for DEL events using mutex-protected queues, ensuring safe parallel access and preventing race conditions in 99.9% of executions.

AI Resume & Cover-Letter Automation System | *Python, Mistral-7B, JSON, LaTeX*

- Developed an AI-powered automation tool that generates tailored resumes and cover letters using Mistral-7B and structured JSON project data, reducing manual writing time by 85% across 40+ job applications.
- Engineered a job-description parsing module that identifies key skills and requirements with 94% accuracy, auto-matching them to relevant projects and experience to create highly targeted, ATS-ready documents.
- Designed a LaTeX-based dynamic resume formatter that programmatically assembles sections, achievements, and technical stacks, improving keyword alignment by 35% and increasing recruiter engagement by 22%.

Docker Manager | *Python, Docker*

- Automated deployment workflows and environment configuration by creating modular, containerized setup scripts that standardized project initialization and eliminated manual configuration errors across multiple backend environments.
- Reduced setup times by 70% through a fully scripted lifecycle system that handled container creation, teardown, logging, template generation, and version-controlled updates, enabling rapid provisioning for new Python, Node.js, and Django projects.
- Implemented robust testing and release management workflows aligned with CI/CD best practices, integrating automated health checks, environment validation, and reproducible builds to streamline development and ensure consistent deployment across systems.

EXPERIENCE

Freelance Computer Science Tutor

Self-employed

Gainesville, FL

May 2023 – May 2025

- Mentored 10 + students in programming fundamentals, including Java, SQL, and data structures.
- Led collaborative sessions focused on debugging, version control, and code documentation.

TECHNICAL SKILLS

Languages: Java, C++, Python, JavaScript, TypeScript, C, C#, SQL, HTML, CSS

Frameworks: React.js, Node.js, Express.js

Tools: AWS, Git, Visual Studio Code, Docker, Postman

Databases: MariaDB, PostgreSQL, MySQL, Firebase, MongoDB

Core Competencies: RESTful APIs, OOP, Testing & Debugging, Documentation, Source Control, Problem Solving, Agile Teamwork
