EDUCATION

University of Florida

Bachelor of Science in Computer Science

Gainesville, FL

May 2025

Miami Dade College

Associate in Computer Science

Miami, FL

May 2023

PROJECTS

IMDB (Key-Value Database) | C++

- Built a concurrent key-value store with LRU eviction and persistence, supporting 100+ parallel operations and improving access speed by 40%.
- Implemented role-based access control (RBAC) with secure admin/user privileges, eliminating unauthorized modifications.
- Developed a thread-safe Pub/Sub system for DEL events using mutex-protected queues, preventing race conditions in 99.9% of executions.

AI Resume & Cover-Letter Automation System | Python, Mistral-7B, JSON, LaTeX

- Built an AI-powered resume automation tool using Mistral-7B and structured JSON, cutting writing time by 85% across 40+ applications.
- Implemented job-description parsing and skill matching with 94% accuracy to generate targeted, ATS-optimized resumes.
- Designed a dynamic LaTeX resume generator that improved keyword alignment by 35% and recruiter engagement by 22%.

Docker Manager | Python, Docker

- Automated deployment and environment setup using modular, containerized scripts to standardize backend initialization.
- Cut setup time by 70% with a scripted container lifecycle system supporting Python, Node.js, and Django projects.
- Implemented CI/CD-aligned testing and release workflows with automated validation, health checks, and reproducible builds.

EXPERIENCE

Software Developer

UF Open Source Club

Gainesville, FL

May 2023 – May 2025

- Refactored and cleaned codebase to improve performance, readability, and maintainability.
- Implemented geographic localization features for the Echo Chat application.

Freelance Computer Science Tutor

Self-employed

Gainesville, FL

May 2023 – May 2025

- Mentored 10+ students in programming fundamentals, including Java, SQL, and data structures.
- Led collaborative sessions focused on debugging, version control, and code documentation.

Computer Science Peer Tutor

Miami Dade College

Miami, FL

May 2022 – May 2023

- Assisted CS students with debugging, programming assignments, and core software concepts.
- Guided peers on development tools, libraries, and coding best practices.

TECHNICAL SKILLS

Languages: C, C#, C++, CSS, HTML, Java, JavaScript, Python, SQL, Typescript

Frameworks & Frameworks: Angular, Django, Express.js, Node.js, React, React Native, Spring Boot, Vue.js

Databases: Firebase, MariaDB, MySQL, PostgreSQL, MongoDB

Tools/Technologies: AWS (Lambda, Dynamo DB, S3), Cloudflare, Docker, Expo, GCP(Cloud Run), GitBook, Heroku, Jira, Mininet, Node.js, OpenGL, Tailwind CSS, Vercel
